

Introducing Instantaneous Pricing

weatherXchange® is pleased to announce the inclusion of instantaneous indicative pricing as part of Version 4 of the weatherXchange platform. Instantaneous pricing will be provided by multiple Protection Sellers based upon their internal pricing algorithms.

How it works

Instantaneous pricing is designed such that immediate pricing feedback can be incorporated into the process of structuring a hedge.

- Step #1 Design a hedge using the weatherXchange structuring wizard
- Step #2 Click “Get Automated Indicative Pricing”, and view pricing from each Protection Seller
- Step #3 Modify the structure if needed and then reprice
- Step #4 Once the hedger is satisfied with the structure and indicative cost they can then request firm pricing

Summary

- Instantaneous prices are provided by six Protection Sellers.
- Pricing is provided by each Protection Seller and is based upon company’s proprietary pricing algorithms.
- Pricing is indicative. Firm pricing can still be obtained from all Protection Sellers.
- Instantaneous pricing can be incorporated into the structuring process such that Hedgers / Brokers can better understand the impact of structure modifications on prices.

Benefits

- Reduces the lead time required by Hedgers to create a structure that meets their hedging needs and their budget.
- Increases market transparency.
- Allows Broker-Advisors in client-facing situations to immediately show the impact of “tuning” a hedge.
- Database of pricing requests provides insight on market trends.

Participation

weatherXchange continues to expand the number of participants on the platform. New Protection Sellers, Brokers, or hedgers are all welcome to participate. Please contact us at info@weatherXchange.com for additional information about weatherXchange.

Indicative Prices

Automated prices are indicative only. The final prices may vary depending on various factors such as market conditions, credit risk, portfolio compositions, legal and administrative fees of certain jurisdictions. For a firm price please contact the protection seller using the 'Get Firm Price' button.

| Company Name | Indicative Sell Price | Information |
|--------------|-----------------------|---|
| Company #1 | EUR 4,373,234.85 | Get Firm Price |
| Company #2 | EUR 4,000,200.00 | Get Firm Price |
| Company #3 | EUR 5,111,518.90 | Get Firm Price |
| Company #4 | EUR 4,553,421.00 | Get Firm Price |
| Company #5 | EUR 3,850,100.50 | Get Firm Price |

Investment Advising. weatherXchange does not purport to and does not, in any fashion, provide investment or trading advice. Information provided by weatherXchange on its website, in its marketing materials, on the weatherXchange Platform, and through the Speedwell Calculation Service should not be considered as advice or a recommendation to investors or potential investors.
